Modelling Concept to Reality

Dr Carlos Perez-Collazo
10th Sep 2018
What is Physical Modelling?

Reproduced with kind permission from Searaser Ltd.
Why Physical Modelling?

- Qualitative and quantitative assessment of designs response to waves, currents and wind
- Systematic variation of wave, current and wind conditions
- Investigation of different design options
- Easier and cheaper instrumentation then at full scale
- Calibration / Validation of numerical models
- Demonstration of performance to investors
- Significant cost savings by learning about problems before going to full-scale
