Book 2

Site 1: Sandford Hill

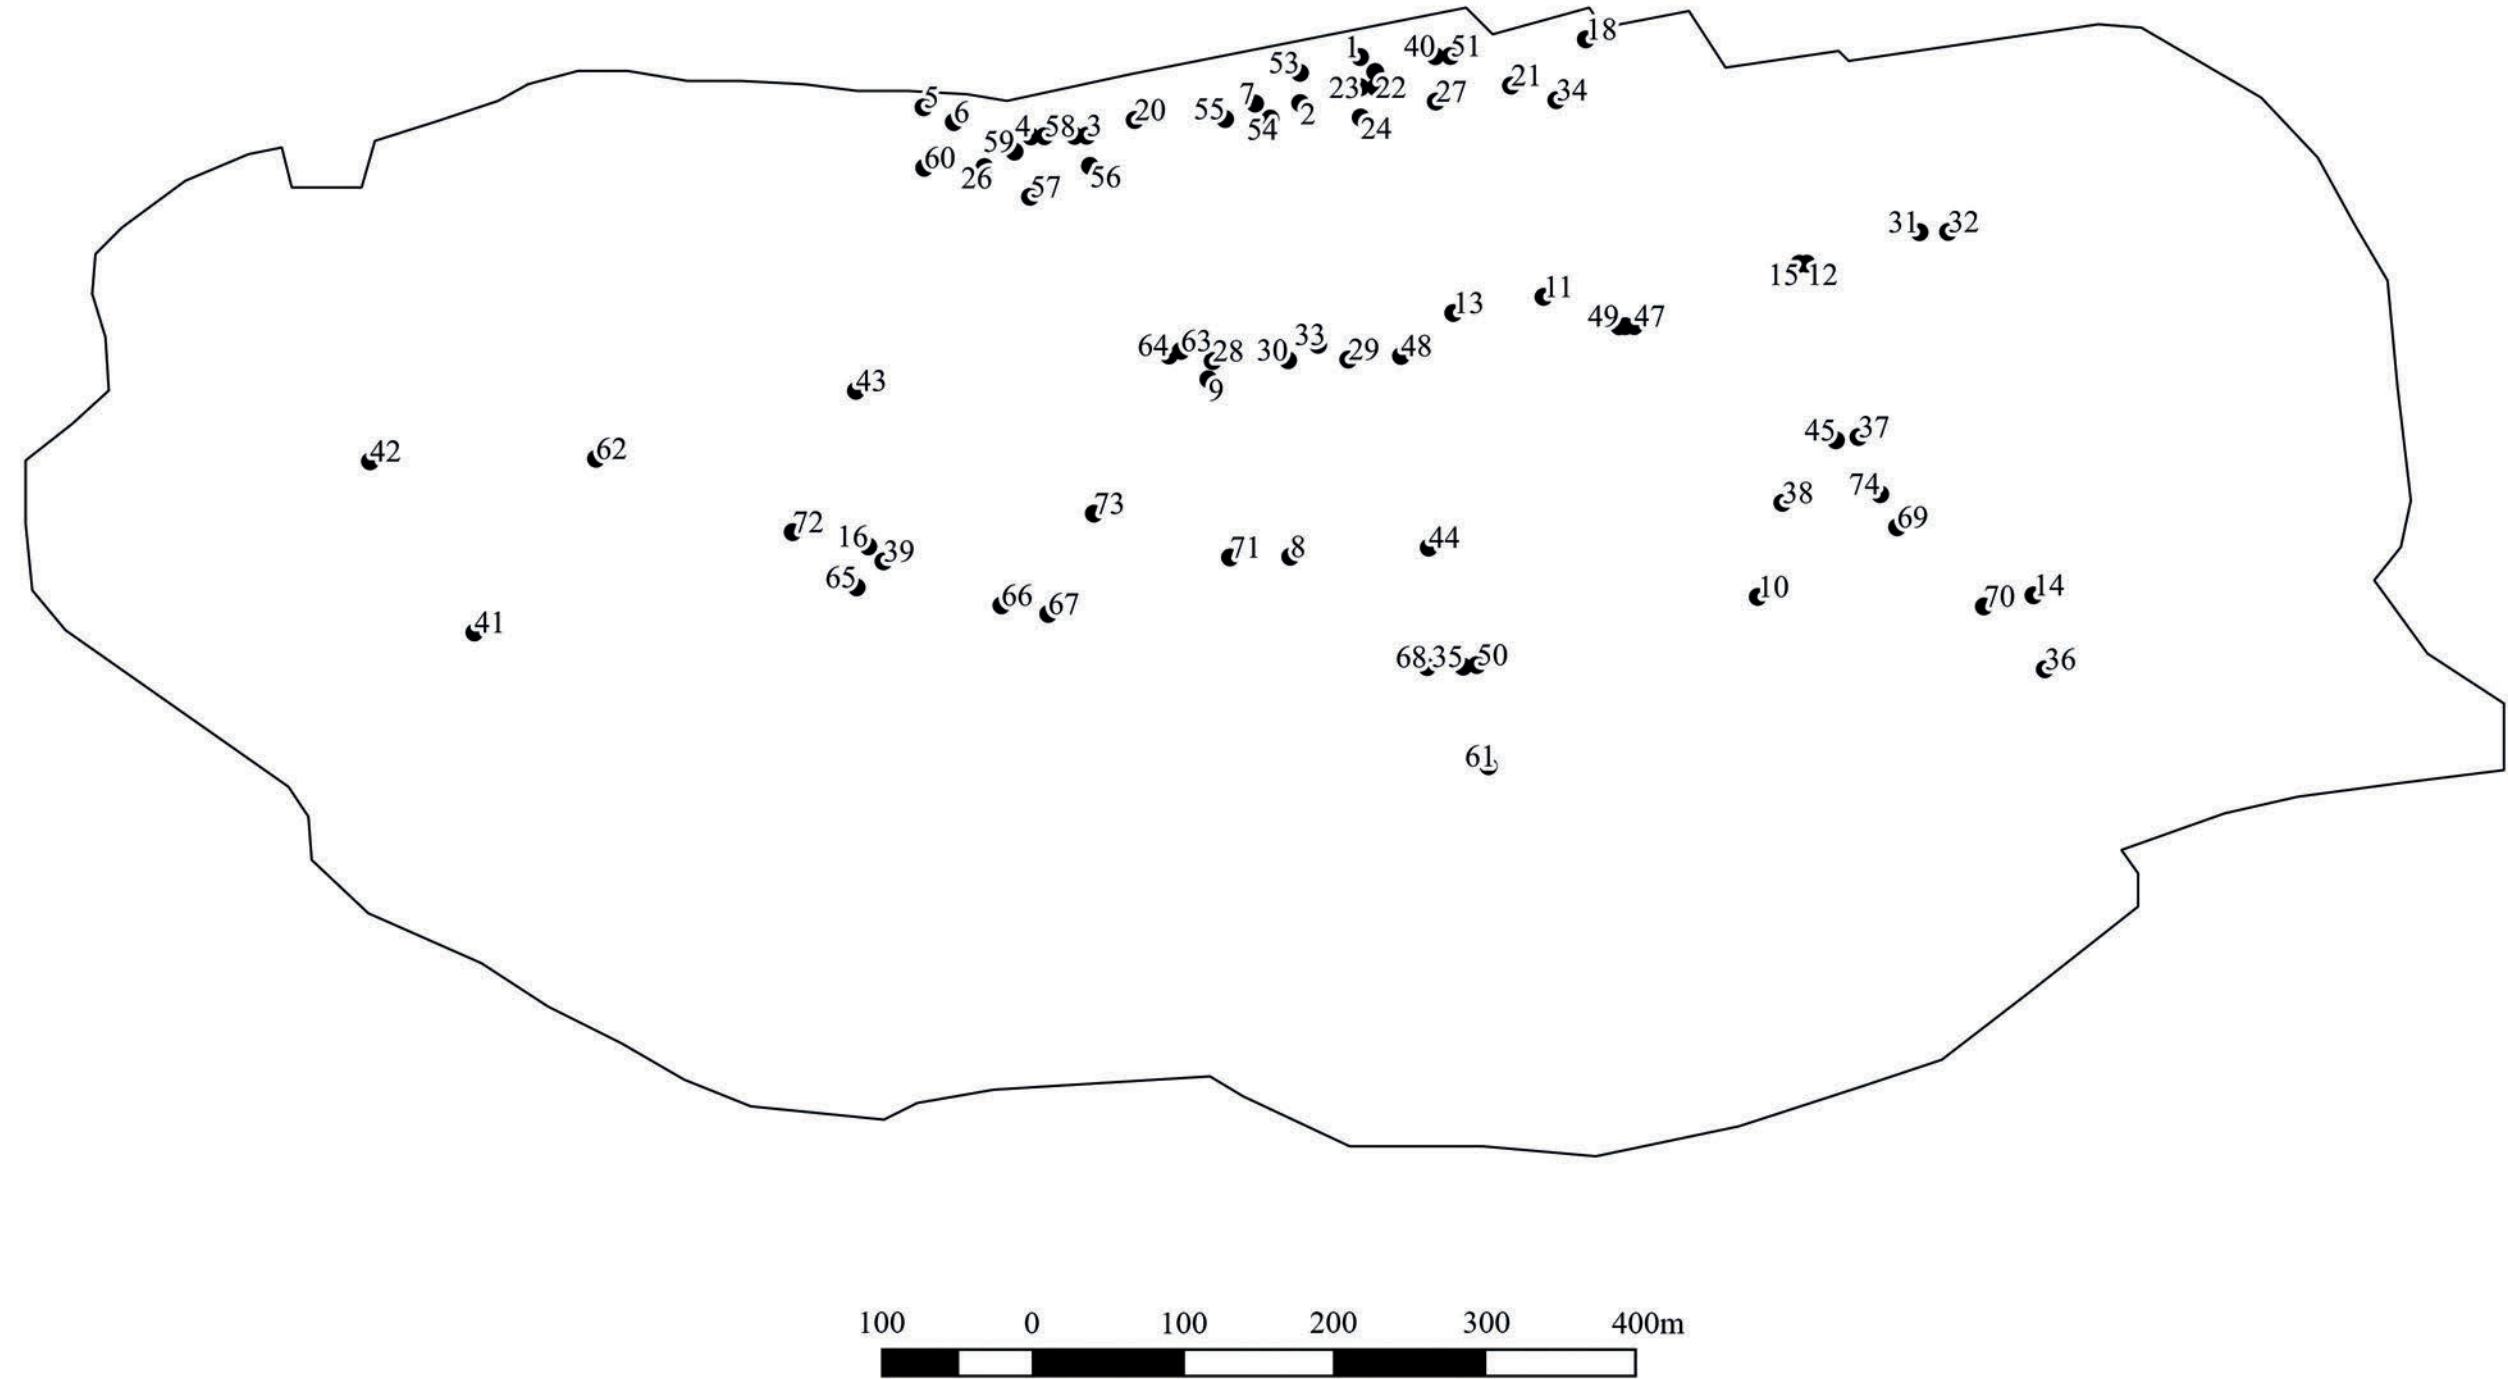

Photographs of disused mine workings on a hill within the
Mendip Hills

Area of Outstanding Natural Beauty

This book was made in the context of a PhD that investigates how photography might be used to interrogate the visual consequences of conservation legislation enacted within the Mendip Hills. The objective in this case study was to make a series of photographs of locations recorded in a caving archive. These places are sites that were created or modified through mining activity, and, when viewed through

this historical lens, operate as signs of a previous relationship with the land. The pictorial strategy uses the ‘scenic view’ to reference the inclusion of these post-industrial sites within the Mendip Hills Area of Outstanding Natural Beauty. The geo-locative method employed is subsequently developed further in books 3, 4 and 5.
