Book 3

Site 2: Banwell Wood

Photographs made around the boundaries of two scheduled monuments within the

Mendip Hills

Area of Outstanding Natural Beauty

This book was a made within the context of a PhD scheduled monument boundaries. For the centre frame where the visual consequences of conservation legof each triptych the camera was set using a compass islation are examined within the Mendip Hills. The to point along a specific bearing and a photograph was photographs in this case study are a response to the made with a 60° angle of view. Two subsequent frames boundaries of two scheduled monuments within the were then made at each point looking left and right to same geographical area. The work consists of two sets compile a 180° view from that position. In the first of of photographic triptychs, one for each monument, that the sites, 'A Roman Camp in Banwell Woods', each follow a strict, conformist, pictorial strategy. The practriptych represents the view looking toward the centre tice in this case study is concerned with what happens of the designation. In the second site, 'Banwell Camp', when aesthetic decisions often made in the field are the camera is positioned so that the centre of each tripinstead directly informed by the positioning of contych looks away from the scheduled monument along a bearing perpendicular to the boundary line. The objecservation legislation. The choices of where to set the camera and the direction to point the lens were made in tive of this case study was to begin to question through the studio using a series of maps adapted for this study. photography one way in which a conservation boundary The photographs were made at the points of intersection might shape how a place is looked at and photographed. between lines drawn along cardinal and inter-cardinal The ideas examined in this case study are taken further bearings from the centre of each designation and the in books 4 and 5.
