International Whaling Practises

I am a third year Ocean Science and Marine Conservation student at the University of Plymouth. I am conducting a survey on international whaling practises, specifically what is known about international bans as part of my final year research. I would be very grateful if you could spend a short time answering the questionnaire.

Description of Research Processes

If you agree to take part, you will be asked to participate in a short questionnaire. This questionnaire will last no more than 15 minutes. If you do not wish to answer a question within the survey, simply select the 'prefer not to say' option and move onto the next question. Your responses to the questions will be recorded through an online system and no personal information will be collected. The information recorded is confidential and will not be used, stored, or retained beyond my research.

Voluntary Participation and Right to Withdraw

Participation in the study is voluntary. You do not have to participate in the research. Because of the anonymous nature of this survey, it is not possible to withdraw from the study after responses have been submitted. This is because there is no system in place to identify individuals or their answers. If you wish to withdraw, simply close the questionnaire browser before reaching the submission point. If you do this, your response will not be recorded.

Confidentiality

All information will be confidential, with no personal data collection. No information will be shared with a third party.

By taking part in this questionnaire, you have read and understood the information given to you and have had the opportunity to withdraw if you so wish.

By ticking the 'I agree' box, you are indicating that you are at least 18 years old, have read and understood the information provided, and agree to anonymously participate in this study*.
