Bronze Spheric Theme

Original work c.1960, digitised 2019-20

Digital 3D Model

"This projected model allows Gabo's Bronze Spheric Theme to revolve in space as the artist originally intended. As you step into the corner of the gallery, motion sensors follow your movement and direct the digital model to rotate.

Gabo used transparent and reflective materials to harness light within sculptures. He also developed moving sculptures and designs for projections onto buildings. This 3D model follows Gabo's innovative use of materials and technologies. Using 3D scanning and photogrammetry the original sculpture was captured in detail. The digital model was then made interactive using game engine software."

(Gallery information panel)

The original Bronze Spheric Theme is on display in [Gallery 1](#) as part of [Modern Art and St Ives](#).

With thanks to Nina and Graham Williams.

This project was co-produced with [i-DAT](#) and [Tate Digital](#).
